DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-8, 25, and 27-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (APA) in this instant application.

With respect to claims 1, 3, 25, and 27, Fig.3 shows an apparatus comprising:

first means including a gain medium (12) for providing a collimated beam of electromagnetic energy with a predetermined orientation with respect to a line of sight thereof, and

second means (porro prisms 14 & 24) for rotating said beam such that a transverse mode selection (beam reflected from porro prism 14) therefor relative to said gain medium is the same for two orthogonal directions thereof.

However, Fig.3 lacks a slab laser.

Fig.2 and page 1, lines 25-26 in the instant specification disclose a slab laser.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to replace Fig.3 what is taught by Fig.2 because the slab laser and the rod laser can be alternate in the solid state lasers (lines 25-26 in the instant specification).

With respect to claims 4 and 28, Fig.3 shows said prism is rotated 45 degrees about the line of sight with respect to slab axes (as pointed out on page 9, lines 9-10, a porro prism is rotated 45 degrees and therefore the Fig.3 porro prism must do the same).

With respect to claims 5 and 29, Fig.3 shows the beam is rotated through two successive round trip passes through said slab.

With respect to claims 6-7 and 30-31, page 11, lines 17-18 disclose an anamorphic telescope.

With respect to claims 8 and 32, page 2, line 20-21 discloses the (intra-cavity) telescope disposed between said slab and said prism.

Allowable Subject Matter

Claims 9 and 33 have been indicated allowed in the previous office action.

Claims 10-23 and 34-46 have been found allowable due to their dependency on claims 9 and 33.

Claim 24 has been indicated allowed in the previous office action.
